Coronavirus or COVID-19 is a new respiratory virus that spreads from person to person.

COVID-19 is spread through coughing and sneezing.

Those with pre-existing conditions, such as black lung, are at higher risk.

There are confirmed cases of COVID-19 in the US.

You may get infected by touching a surface that has the virus on it.

Symptoms include fever, cough, and shortness and breath.

Avoid unnecessary travel.

Avoid touching your face with unwashed hands.

Wash your hands frequently.

Stay up to date with all recommended vaccinations.

Seek medical advice if you develop symptoms, and have been in close contact with a person known to have COVID-19 or if you live in or have recently been in an area with ongoing spread of COVID-19.
